4. FIRST-AID MEASURES

Inhalation: Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact: Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact: Rinse with water. Get medical attention if irritation develops and persists.
Ingestion: Exposure to hot material may cause thermal burns. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media: Use fire-extinguishing media appropriate for surrounding materials.
Extinguishing media which must not be used for safety reasons: None known.
Specific hazards: During fire, gases hazardous to health may be formed.
Special protective equipment for fire-fighters: Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions: Move containers from fire area if you can do so without risk.
Specific methods: Use standard firefighting procedures and consider the hazards of other involved materials.

6. ACCIDENTAL RELEASE MEASURES

Containment procedures: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible.
Environmental precautions: Prevent further leakage or spillage if safe to do so.
Methods for cleaning up: Sweep or scoop up and remove. Wipe up with absorbent material (e.g. cloth, fleece). After cleaning, flush away traces with water. For waste disposal, see section 13 of the SDS.
7. HANDLING AND STORAGE

Handling  Avoid prolonged exposure. Observe good industrial hygiene practices. It is a good industrial hygiene practice to minimise skin contact.

Storage  Store in original tightly closed container.

Recommended monitoring procedures

Not available.

Engineering measures

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. General ventilation normally adequate.

Personal protective equipment

Respiratory protection  In case of insufficient ventilation, wear suitable respiratory equipment.

Hand protection  For prolonged or repeated skin contact use suitable protective gloves.

Eye protection  If contact is likely, safety glasses with side shields are recommended. Eye wash fountain is recommended.

Skin and body protection  Wear suitable protective clothing.

Hygiene measures  Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
