Take Your Application to the Next Level

EP50

Ready to use in seconds and with a simple on-screen interface, the Olympus EP50 camera makes digital imaging of microscopy samples a fast and engaging experience.

- Wireless observation and control of microscope imaging by the camera's own WLAN signal or by integration into an existing network structure
- Display live images directly on a high-resolution monitor or projector without additional hardware
- Fast and smooth live image at 60 frames per second
- Easy storing of images and movie files on an SD card for sharing and further investigation
- Flexible camera control options for image acquisition and display, basic measurements, and annotations: EPview app, EPview software or on-screen display software for stand-alone operation

Academic Research

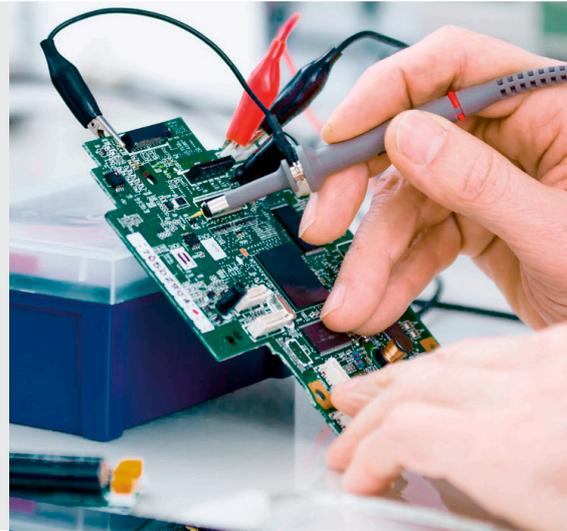

Improve learning and your research by building a digital environment. Share images and experiences in real-time, through displays, projectors and mobile devices.
